Purpose

According to ASPCA re-homing survey, "PET PROBLEMS" are the most common reasons why an owner rehouse a pet.

"PET PROBLEMS" refer to the issues and contradicting personalities and lifestyle of the owner and the pet.

Going from home to home can take quite a toll on the pet behavioral and mental health because of separation anxiety and results in behavioral issues

For example

The siberian husky are known for their intelligence and beautiful facial features however they have become one of the most re-homed breeds because people often don't realize how energetic and stubborn they can be.

How can GROWLR Help

Using a matching algorithm GROWLR matches the user with the adoptable pets in their area based on the following:

- Personality
- Life details (Kids, other pets, schedules etc)

Languages (USED)

- **HTML**
- **CSS**
- **C#**
- **ASP.net,**
- **JavaScript**
- **bootstrap**
